

CW Native Botanika Shampoo bars and Conditioners

Shampoo Bars

Why use a shampoo bar? Commercial Shampoo is primarily water and silicone poured into plastic jars. I found that commercial shampoo dried out my hair and left deposits that accumulated – we have hard water. Our shampoo bars are formulated specifically for your hair type and packaged with cigar bands. You use shampoo bars differently than liquid shampoo as you only wash your scalp. For all bar soaps, except for Lush style shampoo bars, you may need a vinegar rinse.

Shampoo Bar for Oily Hair : Our Shampoo neem bar for oily hair is made with Olive oil, neem oil, jojoba, coconut oil (cleansing), and activated charcoal (balances your hair's natural oil), as well as local honey (lather and volume). As this shampoo bar has coconut oil it can be irritating if you have sensitive skin. We don't recommend the bar for body.

Shampoo Bar for Dry Hair: Our dry hair shampoo bar is suitable for hard water communities and leaves the hair clean, soft with a touch of volume. Olive oil and neem oil are the only oils used to make this bar and acai berry water and local honey are added for lather. We don't use coconut oil so this bar can be used for hair and body.

Shampoo Bar for Normal Hair: Our Normal Hair shampoo has olive, neem and coconut oil for cleansing with added honey and aloe vera for just the right amount of hydration. The coconut oil in the shampoo bar can be irritating to sensitive skin so we only recommend this shampoo bar for hair.

Naked Vegan, Pine Tar and Aleppo Soap : These soaps are great for hair and body. They have great lather and work well in hard and soft water communities.

Lush Style Shampoo Bar: Lush style shampoo bars are made entirely with solid surfactants naturally derived and produced into powder, prill, or noodle forms. Ours is combined with BTMS 50 and cocoa butter for cleansing and light hydration. There is no need for a vinegar rinse and this bar is suitable for all hair types but very dry, curly, hair.

Conditioners

We make conditioner bars and conditioners. Conditioner bars are unique, solid bars, used for conditioning the hair (not the scalp) and packaged in cigar bands. If your hair only needs light hydration, a conditioner bar may be sufficient, but my dry hair requires more intense conditioning. We made a lovely conditioner, hair rinse and hair serum for hair that needs more than light conditioning.

Conditioner Bar for Dry Hair: BTMS-50 is a conditioning emulsifier that helps detangle and smooth the hair, leaving it soft and manageable. Our conditioner bars are eco-friendly and perfect for those looking to reduce their plastic consumption. Plus, they are great for travel as they are compact and not subject to any liquid restrictions. Try our conditioner bar for normal hair and experience the benefits for yourself!.

Conditioner Bar for Normal Hair: This conditioner bar also uses BTMS 50 with cetyl alcohol, Tucuma butter, centrimonium chloride, and Hydroloyzed silk for light conditioning, this cream a must-have for anyone looking to diminish the appearance of scars and improve overall skin health.

Abyssinian Body & Hair conditioner: Our Abyssinian body and hair conditioner is lovely. The star ingredients are lightweight Abyssinian oil and BTMS 50. It can be used as conditioner (leave in or wash off) and lightweight lotion.

Hair Rinse for Dry Hair: Perfect for those in need of a little extra moisture and TLC for their locks. Our unique formula contains high quality silicone and other nourishing ingredients that work wonders on dry, lackluster hair (just like mine). This hair rinse is specially designed to detangle and define curls, leaving them looking and feeling soft, smooth, and rejuvenated. Even if you don't use it every day, you'll be glad to have it on hand when your hair needs a little extra love. Our Hair Rinse also doubles as a nourishing conditioner for normal hair when used every other day.

Hair Serum: Hair serum is for those days when your hair needs a little something extra to look its best. This serum leaves your hair shiny and manageable. We package it in a airless pump because you only need a wee amount for it to work. If you use too much it will make your hair look and feel greasy. This serum has the faint scent of Tulsi which is used in as a hydrosol.
